

White Papers to be used to Train W2V AI Model

White Paper	Technical Report Description	Status
1 Way To the Village Summary	A high level complete summary of all the system that connects all the white papers together, explains how all of the project components work together : Components : 508c1a state church, donors, investors, village residences, builders , Village formation, Village DAO, 508c1a village land trust, permaculture planning, village AI Consultant, Village Financing,	In Work
2 Philosophy	Define the philosophical agreements among this community that will be the foundation to collaboration and conflict resolution. Agreements: symbiosis is priority, focus on your inner work, don't project negative thoughts , meditation, follow conflict resolution system.	In Work
3 Village Land Trust 508c1a	Covers the 508c1a legal summary, the benefits of a 508c1a, land sovereignty, land trust, the process to make a 508c1a	In Work
4 Village Land DAO	Covers the DAO that runs the operations of the village, manages the records, provides voting system, provides land parcel ownership records and parcel transfer process, provide shared resource management, provide equitable resource distribution system and other features	In Work
5 DAO software Design	A library of DAO code and design instructions for the AI to follow so tht it can generate software for the community to use in collaboration	In Work
6 State Church Trust 508c1a	Provides a state wide church organization that connects all the villages together. The state church manages the shared construction equipment to be available to all villages building in the state. The state church org ensures all of the villages are compliant with the Way to the Village philosophy (to protect the purity of the movement) . The 508c1a is controlled by the church DAO, this DAO gives voting rights to all the villages.	In Work
7 State Church DAO	Details of the State Church DAO functionality	In Work
8 Village Permaculture	Permaculture report and designs for Colorado	In Work
9 Project Collaboration	Covers how the online forum community will develop white papers, to train an AI model, to help consult further completion of the white papers that will update the AI, that will be used to help build DAO software sudo code, that will be used to program DAO software, that will be used to run the villages and the state church, to begin to grow. Provide a process flow how the online community will collaborate to create and run "Way to the Village" project.	In Work
10 Village AI Thesis	Covers all of the subjects that the private AI model will be trained in so that it is an expert in all the subjects needed for Village support. The AI will also serve functions like community fostering, village fund raising, village formation applications, village formation process, village operation, community conflict resolution, permaculture consultant, village design consultant, legal process guide.	In Work
11 Village Finance Strategy	List the ways to raise money for villages. Tax deductible donations, personal loans with payment plan secured in DAO software , Benefits of giving donations to a village (bug out location),	In Work
12 Order of the Builders	Where we outline the rites nd rituals of the nomadic builders. How they qualify and bring in new members. How they make decisions and act as a collective.	In Work
13 Village Real Estate	The systems we use to own and sell our land parcels internally within the Village DOA software. How we ensure new members buying into a community are in symbiosis nd consensus with the existing community. How we avoid paying taxes on our land and the transfer of it,	In Work
14 Household Design	I collection of different build methods and design decision process. A way to select the right design for the specific area and a complete cost and labor analysis. The ability to output initial architecture drawings to be finalized for construction using a library of different build templates that connect together.	In Work
15 Power System Options	I list of different power solutions and a logic system that helps people select the most effective designs for that particular location and demand by the community. An ability to output budget and build instructions for the chosen solutions.	In Work
16 Septic System Options	I list of different septic solutions and a logic system that helps people select the most effective designs for that particular location and demand by the community. An ability to output budget and build instructions for the chosen solutions.	In Work
17 Community Structure Design	Different community configuration models that are sustainable , providing the details and agreements suggested for different community models : air'BnBs, retreat centers, outdoor adventure park, mushroom farm, animal husbandry / slaughter , shared workshop production, self sustaining farm, ect...	In Work

18	Fostering Community	A guide to creating and gathering conscious community in new areas to build a pool of individuals interested in creating a village together. Provides a lot of event production templates like ; ecstatic dance, community market, open mic gathering, weekly workshop event and other reason for people to hang out and generate love.	In Work
19	Sovereign Townships	A model for a large group of people to gather funds, purchase all the abandoned housing in empty towns in the US , bring peaceful life back to the community, method to operate as a town along side those not part of the movement and establishing a new healthy economy.	In Work
20	Sovereign Festival	A plan for the movement to support festival gatherings on sovereign land, to build permanent infrastructure while in celebration with each other. Taking this festival culture and directing it's energy and resources into supporting this social movement.	In Work
21	Village Formation Process	All the steps and details of how a village forms ; including finding community, creating a 508c1a land trust, register with the church, create the budget, plan with the village AI, create the land DAO software, raise money in the trust, find the right land, schedule builders and community construction events. include all the detailed steps involved based off what you know about way to the village	In Work
22	Parallel society	The plan to facilitate a self replicating system that encourage and enable others to get out of the city and independent of the current corporate system. A method to correctly control growth. A PR plan to properly present to movement to people finding out about it.	In Work
23	Conflict Resolution	A system and logic tree to resolve all potential conflict that might occur Establishing the initial agreements so that we as community can hold each other accountable to.	In Work
24	Village Staging Land	City Communities buy or rent land as part of the first step in preparation for acquiring villages together. It's a place to gather, meet each other, scavenge/store building materials, fund raise for their chapters , have events and vote on each other seeking village consensus.	In Work
25	Membership Guide	The step by step guide for every type of member who joins the w2v project. Instructions and options for builders, residents, investor and land owners. This will allow the AI to guide every individual into the process automatically, with steps they can take to support their community.	In Work
26	Village Consensus Process	The process in which each individual completes a survey for every other individual around them to anonymously decide who they are wanting to form a village with. It will also document their current budget. The AI will take these surveys and when there is unanimous agreement to buy land together and those members have raised enough money, the AI will notify them they are ready to proceed together.	In Work
